WOW: THE BURNING CRUSADE

Hybrid Hardcore

TBC was never meant for permadeath. We're changing that.
Customizable rulesets. Creative punishments. Competitive houses.
Your rules. Your challenge. Your legacy.

SCROLL

THE PROBLEM

TBC Hardcore Is Broken

Random One-Shots

TBC dungeons are brutal. Fears into extra packs, cleaves from behind, unavoidable boss mechanics. One mistake from anyone in your group and your 80-hour character is gone forever.

The Re-Leveling Slog

Die at level 68 in a dungeon? Start over. The 58-70 grind through Hellfire Peninsula for the fifth time kills motivation faster than any boss mechanic ever could.

One Size Doesn't Fit All

Every guild has different ideas about what makes hardcore fun. Current addons enforce rigid rules with zero flexibility. Your event, your community — but not your rules.

No Competition Framework

Classic HC had the thrill of survival. TBC needs more. There's no scoring, no house competition, no micro-achievements. Just... don't die. That's not enough for 6+ months of content.

THE SOLUTION

Hardcore, Reimagined

Hardcore Plus introduces **Hybrid Hardcore** — keeping the thrill of permadeath leveling while making endgame viable through configurable checkpoints, creative penalties, and a deep competition layer that keeps every player engaged for months.

HARDCORE

Pure HC

Traditional permadeath. One life. Die and your character is permanently voided. Gear destroyed. Guild-marked as dead. The ultimate challenge.

- Permadeath enforced
- SSF enforced (no mail, no AH, no trade)
- Full gear destruction on death
- Guild auto-notification

HYBRID HC

The Sweet Spot

Hardcore leveling with configurable checkpoints. Multiple lives in instances. All the thrill, none of the "I quit because Moroes one-shot me" moments.

- HC leveling (1-60/70, configurable)
- Instance checkpoints & extra lives
- Configurable death penalties
- GM sets instance rules per raid tier

NULLCORE

Score Only

No gear loss, no permadeath. Points deducted on death. Perfect for guilds that want competitive scoring without the heartbreak.

- Death = score penalty only
- Gear and inventory kept
- Open economy
- Full leaderboard participation

CORE FEATURES

Everything You Need, Nothing You Don't

Ruleset Engine

Hard rules that can't be changed (HC until 60) and soft rules your GM customizes. Self-Found, SSF, trade restrictions, lockouts — all configurable. Export and import rulesets across guilds. Compare scores across different rule configurations.

Track Everything

Deaths, mob kills, fishing time, steps traveled, dungeons cleared, boss kills, equipment changes, trade activity. Every action feeds into your score and creates data for rewards, punishments, and leaderboards.

Scoring System

Two modes (your community votes): complex multiplier-based scoring OR simple fixed-value points. Thousands of micro-achievements. First to fish 375? Points. Cleared Blood Furnace Heroic? Points. Killed 5 named mobs? Points.

Creative Punishments

Rule violation? Your GM gets notified instantly. Then the fun begins: forced RP-walk for an hour, gear-lock, temporary trade bans. All triggered remotely. Because point deductions are boring.

Houses & Sub-Guilds

Split your guild into competing houses. Each house runs their own Karazhan, competes for points, drafts players with a budget system. Houses merge for 25-man raids. Think Game of Thrones, but in Outland.

Mini-Games

Spontaneous races, scavenger hunts, first-to-X competitions. Your GM drops a challenge, sets the prize, and the guild scrambles. Keeps things fresh between raid lockouts.

Anti-Cheat

Inventory hash snapshots detect gear restoration cheats. Cross-verification between guild members. Companion app enables backend verification. Community can flag suspicious deaths.

Web Dashboard

Configure everything from your browser. Guild management, punishment designer, reward builder, leaderboards, player profiles. No need to be in-game to manage your event.

BUILT FOR THE BIGGEST EVENT

Ready for OnlyFangs 3

Sodapoppin and NMP have outlined their vision for OF3. Aldor vs Scryer. Houses competing within teams. Point systems for heroic clears. Thousands of micro-achievements. Player drafts with rating budgets. **Hardcore Plus was built to power exactly this.**

OF3 NEEDS Houses within Aldor vs Scryer

HC+ DELIVERS Full Houses system with team aggregation. Create houses, assign leaders, track points per house AND per faction. Aldor vs Scryer leaderboard built-in.

OF3 NEEDS Heroics rated by difficulty with points

HC+ DELIVERS Community-voted difficulty ratings per dungeon. Blood Furnace = 20pts, Shattered Halls = 35pts. Automatically awarded on clear. Configurable by GMs.

OF3 NEEDS Thousands of micro-achievements

HC+ DELIVERS Achievement framework with 1000+ definitions. First to fish 375. First to kill 5 named mobs. First to loot a gray from Winterspring yetis. GMs can create custom achievements on the fly.

OF3 NEEDS Player rating & draft system

HC+ DELIVERS Rate players 1-10. Officers draft with point budgets (60pts for 10-man, Ampy costs 10, you cost 7). Prevents sweat-stacking. Fair house composition.

OF3 NEEDS Points redeemable for guild rewards

HC+ DELIVERS GM Reward Designer. Your house farmed the most heroics? Earn Spellstrike for your team. Points convert to tangible in-game advantages.

OF3 NEEDS Weekly guild meeting tallies

HC+ DELIVERS Automated weekly reports. Aldor total vs Scryer total. Top house of the week. Top individual performers. Exportable to Discord or stream overlay.

"How would you even track this?"

— With Hardcore Plus. Every single thing they discussed. Tracked, scored, and displayed.

FOR EVERY PLAYER

No Matter How You Play

THE EVENT CHASER

Want the OnlyFangs experience?

Join a guild running Hardcore Plus and get the full OF3-style experience: houses, points, weekly competitions, creative punishments, and the most hype raid nights of your life. Even if you're not in OF3 itself, **any guild** can run this format.

Houses • Scoring • Drafts • Weekly Reports

THE CHALLENGE SEEKER

Want more challenge and excitement?

Leveling feels too safe? Toggle on Hybrid Hardcore and suddenly every dungeon matters. Every pull is a decision. Track your deaths, build your score, climb the leaderboard. Normal TBC will never feel the same.

Multi-Mode HC • Leaderboards • Achievements

THE HC SKEPTIC

Love HC but think TBC can't work?

You're right — pure permadeath in TBC is brutal and unfair. That's exactly why Hybrid Hardcore exists. Keep the tension of HC leveling. Get checkpoints where it matters. Die to Moroes? You lose points and a life, not 80 hours.

Checkpoints • Instance Lives • Configurable Penalties

THE GUILD MASTER

Running your own event?

Full control over every rule. Design your own punishment system. Create house competitions. Set up achievement hunts. Manage everything from the web dashboard. Your event, your vision, powered by Hardcore Plus.

Web Dashboard • Rule Designer • Punishment Builder

THE STREAMER

Content that writes itself?

House rivalries. Dramatic deaths. Creative punishments landing live. Draft night tension. Weekly point tallies. Mini-game chaos. Every single session generates content your viewers will love. No scripting needed.

Overlays • Alerts • Twitch Integration (planned)

THE SOLO WOLF

Just want to track yourself?

Don't need a guild? Run Hardcore Plus solo. Track your deaths, build your personal score, push for micro-achievements. Compare yourself against the global leaderboard. The addon works just as well for one as it does for five hundred.

Personal Stats • Global Leaderboard • Achievements

SCORING

Every Action Counts

Two scoring philosophies. Your community votes on which to use — or your GM picks for your guild.

Complex Scoring

Dynamic multipliers that reward skill and risk

```
Boss Kill Score =
Base × (MobLvl / PlayerLvl) × Difficulty × Survivors

Example: Level 68 player kills Prince Malchezaar (lvl 73, difficulty 8.5)
100 × (73/68) × 8.5 × 0.9 = 821 points
```

- Rewards underdogs more than overgeared players
- Difficulty multiplier community-voted per boss
- Survivor bonus: more alive = more points each
- Deeper strategic layer

Simple Scoring

Fixed community-voted values, easy to understand

```
Boss Kill Score =
Fixed Value (voted by community)

Example: Prince Malchezaar kill
Community voted: +500 points per surviving player
```

- Crystal clear — everyone knows the stakes
- Community votes on every point value
- Easy to explain to new players
- Less math, more hype

Micro-Achievements — Always Something To Chase

+250	First to kill 5 named mobs
+500	First to reach Fishing 375
+100	Clear Blood Furnace Heroic
+50	Loot a gray from Winterspring yetis
+1000	First Karazhan full clear
+75	Sit in every chair in Shattrath
-200	Death during dungeon run
+150	Win a spontaneous GM race

GMs can create unlimited custom achievements. Hidden ones surprise players on completion.

HOUSES

Your Guild, Many Banners

Inspired by the OnlyFangs 3 format: split your guild into competing houses, each with their own leader, their own raids, and their own glory.

Team Aldor

House Stormforge
4,280 pts
Leader: Ampie • 10 members • Kara: 4/11

House Ironveil
3,910 pts
Leader: Zary • 10 members • Kara: 3/11

House Ashborn
2,750 pts
Leader: Sfan • 10 members • Kara: 1/11

VS

Team Scryer

House Nighthollow
4,100 pts
Leader: Tyler1 • 10 members • Kara: 3/11

House Duskwarden
3,600 pts
Leader: Nick • 10 members • Kara: 2/11

House Felsworn
2,200 pts
Leader: Phin • 10 members • Kara: 0/11

Draft Night
Officers draft players with a point budget. Top players cost more. Build your dream team without stacking all the sweats.

Raid Pairing
Each house runs their own Kara (10-man). For Gruul's and Mag's (25-man), two houses merge. Different matchups every week.

Cross-House Competition
Parse against the house you're paired with. Who does more DPS? Who survives? Weekly leaderboards per house and per team.

Team Aggregation
All Aldor house points combine into the Aldor total. All Scryer houses into Scryer total. The faction war plays out through every heroic, every boss kill, every achievement.

PUNISHMENTS & REWARDS

Consequences That Matter

Punishments

RP Walk of Shame

PREMIUM

Violated a rule? Your character can only RP-walk for the next hour. The entire guild sees you crawling through Shattrath.

Gear Lock

PREMIUM

Can't change equipment for 30 minutes. Hope you weren't about to swap to your healing set.

Trade Embargo

PREMIUM

Temporary ban from all trading. No mail, no AH, no player trades. Self-found whether you like it or not.

Point Deduction

FREE

The classic. Lose 100-500 points depending on the severity. Your house feels it too.

Rewards

BiS Gear Allocation

Your house earned the most points this week? Spellstrike goes to your house's tailor. Tangible in-game advantage.

Hidden Achievements

Surprise rewards that pop up when you least expect them. The GM planted them. You just happened to loot that specific gray item.

Weekly MVP

Highest scorer of the week gets announced guild-wide. Custom title in the addon. Bragging rights are forever.

Mini-Game Prizes

Win a spontaneous race? GM sets the prize: bonus points, priority on next loot council, or just eternal glory.

PREMIUM

Command Center: Web Dashboard

Manage your entire event from your browser. No more typing slash commands in-game to configure 50 rules.

Guild Rules Designer

Toggle every rule on/off. Set death penalties per zone. Configure instance lives. Export your ruleset as a shareable link.

Punishment & Reward Builder

Create custom punishments and rewards. Set triggers, durations, and conditions. Assign them to rule violations or achievements.

House Management

Create houses, assign leaders, run the draft. View house standings, member performance, raid progress. All in one place.

Live Leaderboards

Player rankings, house standings, team totals. Updated every few minutes. Embeddable widgets for your stream overlay or Discord.

Achievement Designer

Create custom micro-achievements for your event. Set point values, descriptions, and whether they're public or hidden surprises.

Analytics & Reports

Weekly automated reports. Death heatmaps. Scoring trends. Most deadly dungeons. Most active houses. Export to Discord or PDF.

DEVELOPMENT

The Roadmap

PHASE 0

Concept & Architecture

Final feature spec. Free vs Premium matrix. Competitor analysis. Technical architecture. OF3 requirements mapping.

1-2 weeks

PHASE 1

PoC: Basic WoW Menu

Working addon in TBC 2.4.3 client. Simple menu with a button. Proof that the foundation works.

1-2 weeks

PHASE 2

Tracking Library

Build modular tracking for deaths, kills, movement, trades, dungeons, gear. The data backbone of the entire addon.

2-3 weeks

PHASE 3

Guild Communication Layer

Addon-to-addon messaging. Ruleset sync. Death broadcasts. Reusable plugin architecture for all social features.

2-3 weeks

PHASE 4

Web Voting & Backend

Community voting for difficulty ratings and scoring systems. Simple API backend. Foundation for web dashboard.

1-2 weeks

PHASE 5

Rudimentary HC Addon

First playable version with examples from every feature category. Death tracking, scoring, one punishment, SSF enforcement, basic leaderboard.

3-4 weeks

PHASE 6

Alpha → Beta

All core features. Houses system. Mini-games. Web dashboard MVP. Companion app. Anti-cheat. Full feature set.

4-6 weeks

PHASE 7

Playtesting & Launch

Closed beta. Feedback. Balancing. Stress testing. CurseForge upload. Patreon premium system. GM documentation.

4-6 weeks
